PROJECTS / OPEN-SOURCE

Social Media Web Application

React, Node, Express, MongoDB

I am creating a social media web app using React, Node, Express, and MongoDB. The app enables users to create a profile, post content, like and comment on posts, and follow other users. The frontend was built with React, the backend with Node.js and Express, and data was stored and retrieved using MongoDB. The project showcases my full-stack development skills and ability to design and deploy modern web applications.
